

LVD TEST REPORT

Report No.: NTEK-2015NT06162066S

Product: Roof & Gutter Deicing Heating Cable

Model No.: RGDC1-1A240, RGDC1-1A020, RGDC1-1A030,

RGDC1-1A060, RGDC1-1A080, RGDC1-1A100, RGDC1-1A120, RGDC1-1A140, RGDC1-1A160,

RGDC1-1A180, RGDC1-1A200

Applicant: Yangzhou E-poly Technology Co., Ltd.

Address: No.12, Lingbo Road, Economic Development Area,

Gaoyou City, Jiangsu Province, China

Issued by: Shenzhen NTEK Testing Technology Co., Ltd.

Lab Location: 1/F, Building E, Fenda Science Park, Sanwei Community,

Xixiang Street, Bao'an District, Shenzhen P.R. China

Tel: (86)-0755-61156588 Fax (86)-0755-61156599

This test report consists of **98** pages in total. It may be duplicated completely for legal use with the approval of the applicant. It should not be reproduced except in full, without the written approval of our laboratory. The client should not use it to claim product endorsement by NTEK. The test results in the report only apply to the tested sample. The test report shall be invalid without all the signatures of testing engineers, reviewer and approver. Any objections must be raised to NTEK within 15 days since the date when the report is received. It will not be taken into consideration beyond this limit.

Test item description:	Roof & Gutter Deicing Heating Cable
Trade Mark:	E-POLY O
Manufacturer:	Yangzhou E-poly Technology Co., Ltd.
Address:	No.12, Lingbo Road, Economic Development Area, Gaoyou City, Jiangsu Province, China
Model/Type reference:	RGDC1-1A240, RGDC1-1A020, RGDC1-1A030, RGDC1-1A060, RGDC1-1A080, RGDC1-1A100, RGDC1-1A120, RGDC1-1A140, RGDC1-1A160, RGDC1-1A180, RGDC1-1A200
Ratings	AC 230V, 50Hz, 1200W Max.

Test item particulars:	10 10 10 10 10 10
Classification of installation and use:	Fixed appliance
Supply Connection:	Supply cord with a plug
Possible test case verdicts:	4 4 4 4 4 4
- test case does not apply to the test object:	N (/A)
- test object does meet the requirement	P (Pass)
- test object does not meet the requirement:	F (Fail)
Testing:	2 2 2 2 2
Date of receipt of test item:	June 10, 2015
Date (s) of performance of tests	June 10 to July 11, 2015
General remarks:	* * * * * * *
The test results presented in this report relate only to the This report shall not be reproduced, except in full, witho "(see Enclosure #)" refers to additional information app	ut the written approval of the Issuing testing laboratory.
"(see appended table)" refers to a table appended to the	
Throughout this report a comma / point is used a	as the decimal separator.

General product information:

- -An RGDC system can help prevent ice dams and icicles by maintaining a continuous path for melt water to drain from the roof. As long as a heated path from the roof to a safe discharge area is maintained, ice dams will not form. The RGDC system can be used on roofs and valleys and in downspouts and gutters made from many types of standard roofing materials, including metal, plastic, asphalted and fiberglass shingles.
- -The RGDC heating cable is laid in a "zigzag" fashion along the lower edge of the sloping roof. The heater should extend at least 30cm/12in above the level of the outer building wall, or 15cm/6in above the snow fence, whichever is the higher, and extend down into the gutter. This will ensure a continuous run off path for melted water.
- All the modes are listed on the bellowing table. All tests were made on RGDC1-1A240.

ROOF & GUTTER DEICING HEATING CABLE(series)

Model: <u>RGDC1-1A240</u> Length: <u>73M</u> Serial No. <u>150425</u> Watts: <u>1200 W</u> Volts: <u>230V</u> <u>50 Hz</u> Date: <u>25/04/2015</u>

WARNING

- Read installation instructions thoroughly and install only as directed.
- Connect only to ground fault protection outlets.
- Never alter this heating cable in any way.
- Never allow heating cable to touch, cross, or overlap itself at any point.
- Keep all combustible material away from cable

Fire and Shock Hazard

- Do not cover or insulate any part of the cable.
- Do not paint or expose the cable to chemicals such as glue, caulk, or adhesive.
- Do not operate the cable when outdoor temperatures begin to remain above 50°F (10°C)
- The maximum size of the branch circuit is 20A.

ATTENTION: a ground fault protection device must be used with this heating device

IP 67

¹⁾ For fault/error assessment, some components are divided into their sub-functions.

²⁾ For each sub-function in the table, the Table R.2 measure will cover the software fault/error.

³⁾ Where more than one measure is given for a sub-function, these are alternatives.

⁴⁾ To be divided as necessary by the manufacturer into sub-functions.
